

Final Vendor Due Diligence Questionnaire

This comprehensive questionnaire is used in the final due-diligence phase of vendor onboarding to verify that a prospective vendor meets the necessary legal, financial, security, privacy, operational, and reputational risk thresholds before approval. According to industry guidance, an effective vendor due diligence checklist covers all key risk domains – **legal compliance, financial stability, cybersecurity, data privacy, sanctions/AML, operational resilience, ESG, and reputational factors**. The questions below are organized by domain and should be answered by the vendor with supporting documentation where applicable. This template is suitable for vendors of all types (IT, SaaS, manufacturing, logistics, professional services, etc.) and addresses both global standards and region-specific compliance requirements.

Legal and Corporate Information

- **Company History & Structure:** How many years has your company been in business, and what is its corporate structure (e.g. parent company, subsidiaries)? Please list the company's principal owners and board members.
- **Legal Existence:** Is your organization legally registered and licensed to operate in all jurisdictions where it conducts business? Provide registration details or certificates.
- **Regulatory Compliance:** Do you confirm that your business complies with all applicable local, regional, and international laws and regulations relevant to your operations (e.g. corporate, labor, trade laws)?
- **Litigation and Investigations:** Are there any pending or recent (within the past 5 years) legal proceedings, lawsuits, or regulatory investigations involving your company? If yes, please describe the nature and current status.
- **Regulatory Violations:** Has your organization ever been fined, penalized, or sanctioned for any regulatory or legal violations? If yes, provide details and remedial actions taken.
- **Out-of-Court Settlements:** Has the company ever been involved in settlements related to allegations of fraud, corruption, or other misconduct (e.g. settling bribery charges out of court)? If yes, please provide details.

Financial Health and Stability

- **Financial Statements:** Please provide the latest audited financial statements (balance sheet, income statement, cash flow) for your company. These should ideally be the most recent fiscal year's audited accounts.
- **Financial Performance:** Summarize the company's current financial performance and stability (e.g. revenue and profit trends over the last 2-3 years). Note any significant fluctuations or events that impacted financial results.
- **Credit Rating:** If available, indicate any credit ratings your company has from agencies (and the name of the rating agency).
- **Solvency and Debt:** Has your organization faced any issues related to insolvency, bankruptcy, or financial restructuring in the past five years? Disclose any material debt or liquidity concerns that could affect your ability to perform.
- **Financial Dependencies:** Describe any major dependencies on single customers, suppliers, or lines of credit that could pose a risk if changed (e.g. one customer represents a high percentage of revenue).

Information Security and Cybersecurity

- **Security Governance:** Do you have a formal information security program and team in place (e.g. a dedicated security officer or CISO)? Are your security policies aligned with any industry frameworks or standards (such as ISO/IEC 27001, NIST CSF, or SOC 2)? If yes, please list relevant security certifications or attestations (e.g. ISO 27001 certification, SOC 2 Type II report).
- **Access Control:** Describe your access management controls. Do you enforce strong authentication (e.g. multi-factor authentication) and role-based access controls to ensure least-privilege access to systems and data?
- **Data Encryption:** Are data stored by your company encrypted at rest and in transit? If so, specify the encryption standards/protocols used (e.g. AES-256 for data at rest, TLS 1.2+ for data in transit).
- **Vulnerability Management:** Do you conduct regular vulnerability assessments or penetration tests on your IT systems? How quickly do you apply security patches and updates to address known vulnerabilities?
- **Incident Response:** Do you have a documented cybersecurity incident response plan, and has it been tested recently? Describe your procedures for handling security incidents or data breaches.

- **Security Incidents History:** Has your organization experienced any significant security breaches or cyber incidents in the last 3 years? If yes, please provide details on the incidents and measures taken to prevent recurrence.
- **Network Security:** What network security controls are in place (firewalls, intrusion detection/prevention systems, continuous network monitoring, etc.) to prevent unauthorized access?
- **Employee Security Training:** Do you provide regular security awareness training to your employees and contractors? Are background checks performed for personnel with access to sensitive data or systems?

Data Privacy and Data Protection Compliance

- **Privacy Law Compliance:** Is your organization compliant with relevant data protection and privacy regulations in the regions you operate? For example, GDPR (EU), CCPA/CPRA (California), LGPD (Brazil), PDPA (various countries), HIPAA (for health data) etc., as applicable. Please list the laws or standards that apply and briefly describe how you comply (policies, procedures, technical measures).
- **Data Protection Officer:** Do you have a designated Data Protection Officer (DPO) or equivalent privacy officer in your organization, as required under laws like GDPR? If not required, who is responsible for overseeing data privacy compliance?
- **Personal Data Handling:** What types of personal data (if any) will you handle as our vendor, and what measures do you use to protect it (e.g. pseudonymization, encryption, access restrictions)?
- **Data Retention & Disposal:** Do you have policies for data retention and secure deletion/disposal of data once it is no longer needed or upon contract termination? Describe how you ensure personal data is not kept longer than necessary and how it's destroyed (e.g. adhering to standards like NIST 800-88 for data destruction).
- **Privacy Incidents:** Have you experienced any data privacy breaches or incidents (such as unauthorized disclosures of personal data) in the past few years that had to be reported to regulators or affected individuals? If yes, provide details and outcomes (e.g. notifications made).
- **Cross-Border Data Transfers:** If you will transfer personal data across country borders, do you have appropriate safeguards in place (such as Standard Contractual Clauses for EU data exports, or other approved transfer mechanisms)?

Sanctions, Anti-Bribery/Corruption, and AML Compliance

- **Anti-Bribery Policy:** Does your organization have an anti-bribery and anti-corruption policy in place that meets the requirements of laws like the US FCPA and UK Bribery Act? Do you provide training to employees on ethical conduct, bribery prevention, and handling of gifts or facilitation payments? Provide a copy of relevant policies (Code of Ethics, Anti-Corruption Policy, etc.) if available.
- **Corruption or Fraud Incidents:** Have any of the company's owners, executives, or senior managers ever been implicated in, or convicted of, fraud, bribery, embezzlement or other corrupt practices? If yes, please explain the circumstances and any measures taken subsequently.
- **Politically Exposed Persons (PEP):** Are any of the company's beneficial owners or key principals considered *Politically Exposed Persons* (PEPs) or closely connected to government officials (for example, holding public office or related to political figures)? If yes, provide details.
- **Sanctions Screening:** Do you conduct sanctions screening on your company's owners, key personnel, and relevant third parties? In other words, do you screen against international sanctions lists (e.g., OFAC, EU, UN sanctions) and watchlists to ensure no prohibited parties are involved? Please confirm if your organization (including subsidiaries) is not listed on any government sanctions list.
- **Anti-Money Laundering (AML):** Does your company maintain an AML compliance program appropriate to its business? If applicable, do you have a designated compliance officer for AML/CFT and written policies and procedures to prevent and detect money laundering (e.g. customer due diligence, suspicious activity monitoring)?
- **AML Training:** Do relevant employees receive training on anti-money laundering and counter-terrorism financing laws and how to recognize and report suspicious transactions?
- **Beneficial Ownership Transparency:** Please provide a list of ultimate beneficial owners (persons owning a significant percentage of the company) if not already disclosed. This information may be used for our own KYC and sanctions screening purposes.

Insurance and Liability Coverage

- **Insurance Coverage:** Do you carry adequate insurance coverage to cover potential liabilities arising from your operations or services? Specifically, indicate if you have the following and the coverage limits for each: general commercial liability,

professional/errors & omissions liability, product liability (if applicable), cyber liability (data breach) insurance, and any other relevant policies.

- **Certificates of Insurance:** Please provide current Certificates of Insurance or other proof for the policies mentioned above (showing insurer, coverage amounts, and validity dates).
- **Workers' Compensation:** (If applicable) Do you carry workers' compensation or employer's liability insurance as required in the jurisdictions where your employees operate?
- **Claims History:** Has the company had any significant insurance claims or incidents in the last five years (for example, a major lawsuit or incident that resulted in an insurance claim)? If yes, please describe the incident and its resolution (this helps gauge risk history).

Business Continuity and Disaster Recovery

- **BCP/DR Plans:** Do you have a documented Business Continuity Plan (BCP) and Disaster Recovery plan (DRP) in place? Provide a high-level overview of what scenarios are covered (e.g. IT outages, natural disasters, supplier failure) and the strategies for continuity.
- **Plan Testing:** When was the last time you conducted a full test or drill of your disaster recovery and business continuity plans? What did the test entail, and were any improvements identified as a result?
- **Recovery Objectives:** What are your Recovery Time Objective (RTO) and Recovery Point Objective (RPO) for critical systems or services in the event of a disruption? In other words, how quickly can you restore services and how much data loss (in time) is possible?
- **Past Incidents:** Has your organization experienced any major business disruptions or disasters in the past 2-3 years (e.g. significant outages, data center failures, etc.)? If yes, describe the incident and how your BCP/DR plan was utilized to recover (and any changes made afterward).
- **Backup and Redundancy:** Do you maintain off-site backups of critical data and systems? Describe your data backup strategy (frequency of backups, where stored) and infrastructure redundancy (e.g. multiple data centers or cloud availability zones) to ensure continuity of service.
- **Crisis Management:** Who are the key stakeholders responsible for managing a crisis or disaster event at your company, and what is the communication plan to notify customers (such as us) in the event of a major disruption?

Operational Capability and Subcontractor Risk

- **Service Capacity & SLAs:** Describe your current capacity and capability to deliver the products/services we intend to procure. Do you have any standard Service Level Agreements (SLAs) or performance metrics (uptime, delivery times, support response times, etc.) that you adhere to? If yes, provide details of the SLA commitments (e.g. 99.9% uptime, next-business-day support, etc.).
- **Key Subcontractors:** Will any portion of the services or product delivery be performed by subcontractors or fourth parties on your behalf? If yes, list the key subcontractors/partners and what part of the service they handle. How do you vet and manage these subcontractors to ensure they meet the same compliance and quality standards? Do you “flow down” relevant contractual requirements (e.g. confidentiality, data protection) to them?
- **Quality Management:** Do you have a formal quality management system in place (for example, ISO 9001 certification or similar)? How do you ensure consistent quality of your products or services? Please describe any quality control processes or certifications you maintain.
- **Operational Process Control:** Describe any processes or certifications related to operational excellence (for example, IT service management certifications like ISO 20000, Lean/Six Sigma processes, etc., if applicable).
- **Issue Resolution:** What is your procedure for handling and rectifying operational issues, service failures, or product defects? For instance, do you have a trouble-ticket system, defined incident response times, and a corrective action process to prevent future issues?
- **Supply Chain Resilience:** (If applicable to your product/service) How do you manage supply chain risks? Do you source key components from multiple suppliers, and have you faced any supply chain disruptions recently? How were they mitigated?
- **Resource & Staffing:** Do you have sufficient staffing and technical expertise to fulfill this contract? Mention if there are any known capacity constraints or upcoming changes (e.g., rapid growth, labor shortages) that could impact delivery.

Environmental, Social, and Governance (ESG) Risk

- **Policies on ESG Matters:** Does your company have formal policies or statements addressing environmental impact, social responsibility, and governance practices? This could include environmental management policies (e.g. waste reduction, energy use), workplace health and safety policies, ethical labor practices (fair labor, no child labor), and anti-discrimination/equal opportunity policies. Please provide copies or summaries of these policies.

- **Anti-Slavery Compliance:** If required by regulations (such as the UK Modern Slavery Act), do you publish an anti-slavery and human trafficking statement or have a policy to ensure no forced labor in your supply chain? Provide the latest statement if applicable.
- **ESG Reporting:** Do you track or report on any ESG metrics or initiatives? For example, do you produce a sustainability or corporate social responsibility report, or disclose information on your carbon footprint, community engagement, or governance structure? If yes, please share the latest report or relevant data.
- **Diversity & Inclusion:** What efforts or programs does your company have in place regarding diversity, equity, and inclusion in your workforce? Provide any metrics on workforce diversity or initiatives to improve diversity and inclusion.
- **Environmental Compliance:** Has your company ever been cited for environmental regulation violations or faced any environmental incidents (spills, pollution events)? If yes, explain the incident and resolution. Similarly, have there been any major workplace safety incidents or labor disputes in the last few years?
- **ESG Goals:** (Optional) Does your company set any public ESG goals or commitments (e.g., carbon neutrality targets, community impact goals, improvement plans for governance)? Briefly describe.

Customer References and Reputation Risk

- **Client References:** Please provide references from other customers/clients who have used your services or products. Ideally include at least **2-3 client references** with contact information (company name, contact person, phone/email) and a brief description of the work or scope of your engagement with them. These references may be contacted as part of our evaluation.
- **Financial/Banking Reference:** Provide a banking or financial reference (such as your primary bank or a major supplier) that can speak to your company's financial reliability and creditworthiness. Include contact details for the reference.
- **Industry Reputation:** List any relevant industry certifications, accreditations, or awards your company has earned (for example, high partner status with a technology vendor, industry quality awards, etc.), as evidence of your standing in the market.
- **Adverse Media:** Has your company (or key executives) been the subject of any adverse media coverage, public controversy, or reputational issues in the past 5 years? If yes, please describe the situation and any steps taken to address or remediate the issue. This could include negative news articles, social media incidents, or public allegations of wrongdoing.

- **Contract Terminations:** Has a client ever terminated a contract with your company for performance or ethical reasons? If so, please explain the circumstances.
- **Legal Compliance History:** (If not covered elsewhere) Has your company or any executive ever been debarred or disqualified from bidding on government contracts or involved in any unethical business practices not already mentioned? If yes, provide details.

Each of the above questions should be answered truthfully with sufficient detail. Supporting documents (policies, certificates, reports, etc.) should be provided where applicable to verify the responses. By completing this questionnaire, the vendor helps the enterprise assess risks across **all major domains** and ensures that all **legal, financial, security, privacy, compliance, operational, ESG, and reputational criteria** are satisfactorily met before onboarding. The enterprise may follow up on any responses for clarification or additional evidence as needed.

Here are some more questions.

Legal and Corporate Information - Additional Questions

Corporate Governance & Management

- What is your company's corporate governance structure, including details of executive leadership, audit committees, and independent board oversight?
- Do you have established policies for conflicts of interest, and how do you manage situations where management has financial interests in other entities?
- What is your company's succession planning process for key leadership positions and critical roles?
- Are there any management service agreements, consulting arrangements, or other third-party relationships that could influence corporate decision-making?

Intellectual Property & Legal Rights

- What intellectual property does your company own, license, or use (patents, trademarks, copyrights, trade secrets), and are there any ongoing IP disputes or infringement claims?
- Do you have any licensing agreements with third parties that are material to your business operations, and what are the termination or renewal terms?
- Are there any restrictions, liens, or encumbrances on your company's key assets or intellectual property?
- How do you protect proprietary information and ensure compliance with third-party IP rights in your products/services?

Contractual and Legal Obligations

- Are there any material contracts, joint ventures, or partnership agreements that significantly impact your business operations or financial performance?

- Do you have any exclusivity arrangements, non-compete agreements, or territorial restrictions that could affect service delivery?
- What is your standard approach to contract termination, and are there any contracts that cannot be terminated within 90 days?
- Are there any ongoing contractual disputes or breaches that could impact your ability to fulfill obligations to new clients?

Regulatory Environment & Industry Standards

- Which industry-specific regulations, standards, or certifications are applicable to your business (e.g., FDA, FCC, ISO standards, professional licensing)?
- Do you maintain current certifications or accreditations required for your industry, and what is your process for maintaining compliance?
- How do you monitor and adapt to changes in applicable laws and regulations in your operating jurisdictions?
- Are there any anticipated regulatory changes that could materially impact your business model or service delivery?

Legal Structure & Ownership Changes

- Have there been any mergers, acquisitions, spin-offs, or significant ownership changes in the past three years that could affect business continuity?
- Are there any planned corporate restructuring, divestiture, or ownership transfer activities in the next 24 months?
- Do any shareholders or stakeholders have special rights, veto powers, or control provisions that could impact business decisions?
- What is your policy regarding notification of material corporate changes to existing clients and partners?

Insurance and Legal Protection

- What types and amounts of business insurance coverage do you maintain (general liability, professional liability, D&O, cyber liability, etc.)?
- Do you carry adequate insurance coverage for the specific services you will be providing, and can you provide certificates of insurance?
- What is your legal entity's limited liability structure, and are there any circumstances under which principals could have personal liability?
- How do you handle indemnification requirements, and what are your standard terms for liability limitation in client contracts?

Financial Health and Stability - Additional Questions

Revenue Quality and Sustainability

- What is your revenue recognition policy, and how do you account for deferred revenue, contract assets, and long-term service agreements?
- What percentage of your revenue is recurring versus one-time, and what is your average contract length and renewal rate?
- How diversified is your revenue stream across different products/services, geographic regions, and industry sectors?
- What is your typical payment terms with clients, and what percentage of accounts receivable are past due (30, 60, 90+ days)?

Capital Structure and Funding

- What is your current capital structure (debt-to-equity ratio), and what are the terms and covenants of your existing debt obligations?
- Do you have committed credit facilities or lines of credit available, and what are the borrowing terms and unused capacity?
- Have you raised any external funding (equity, debt, grants) in the past three years, and are there any planned fundraising activities?
- Are there any financial covenants, restrictions, or conditions that could limit your operational flexibility or trigger accelerated payment obligations?

Cash Flow and Working Capital Management

- What is your typical cash conversion cycle, and how do you manage working capital requirements?
- What are your monthly operating cash flow requirements, and how many months of operating expenses do you maintain in cash reserves?
- Do you have any seasonal or cyclical cash flow patterns that could impact service delivery during certain periods?
- What is your policy for capital expenditures and investments in technology, equipment, or infrastructure?

Financial Controls and Reporting

- Do you have an independent audit firm, and when was your last management letter or audit findings report issued?
- What financial controls and approval processes do you have for expenditures, contracts, and financial commitments?
- How frequently do you produce internal financial statements, and who has access to financial information within your organization?
- Do you maintain compliance with any financial reporting requirements (public company, regulatory, or lender requirements)?

Financial Risk Management

- What is your approach to foreign exchange risk management if you operate in multiple currencies?

- How do you manage interest rate risk, commodity price risk, or other market risks that could impact your financial performance?
- Do you maintain business interruption insurance, and what would be the financial impact of a significant operational disruption?
- What contingency plans do you have for financial stress scenarios, including plans for cost reduction or emergency funding?

Profitability and Cost Structure

- What is your gross margin by major product/service line, and how has profitability trended over the past three years?
- What percentage of your cost structure is fixed versus variable, and how quickly can you adjust costs in response to revenue changes?
- What are your largest expense categories, and do you have any significant cost commitments or contracts that cannot be easily modified?
- How do you price your products/services, and what is your ability to pass through cost increases to customers?

Related Party Transactions and Guarantees

- Are there any related party transactions, intercompany arrangements, or guarantees that could affect your financial position?
- Do you provide any financial guarantees or commitments to third parties that could create contingent liabilities?
- Are there any off-balance-sheet arrangements, special purpose entities, or variable interest entities associated with your business?
- What is your policy regarding loans to or from officers, directors, or other related parties?

Financial Projections and Business Planning

- What are your financial projections for the next 12-24 months, including revenue, profitability, and cash flow expectations?
- What key assumptions underlie your financial projections, and what are the main risk factors that could cause actual results to differ?
- How do you typically perform against your financial budgets and forecasts, and what is your variance analysis process?
- What capital investments or strategic initiatives are planned that could impact your financial position or service delivery capacity?

Information Security and Cybersecurity - Additional Questions

Security Architecture and Infrastructure

- What is your network segmentation strategy, and how do you isolate critical systems from less secure environments?

- Do you implement zero-trust architecture principles, and how do you verify and authenticate all network connections?
- What cloud security controls do you have in place if you use cloud services (AWS, Azure, GCP), including configuration management and cloud access security brokers (CASB)?
- How do you secure remote access to your systems, and what VPN or secure remote access solutions do you employ?

Data Loss Prevention and Monitoring

- What data loss prevention (DLP) technologies and policies do you have to prevent unauthorized data exfiltration?
- Do you maintain security information and event management (SIEM) systems or security orchestration, automation, and response (SOAR) platforms?
- What continuous monitoring and threat detection capabilities do you have, including behavioral analytics and anomaly detection?
- How do you monitor and log privileged user activities, and what controls prevent unauthorized administrative access?

Third-Party and Supply Chain Security

- How do you assess and monitor the cybersecurity posture of your third-party vendors and suppliers?
- Do you require security assessments or certifications from your subcontractors who may have access to client data?
- What controls do you have for secure software development, including secure coding practices and third-party component vulnerability management?
- How do you manage and secure API integrations with external systems and partners?

Backup and Recovery Security

- What are your data backup and recovery procedures, and how do you ensure backup integrity and security?
- Are your backups encrypted and stored in secure, geographically separate locations?
- How frequently do you test your backup and recovery procedures, and what is your recovery time objective (RTO) and recovery point objective (RPO)?
- Do you have offline or air-gapped backup systems to protect against ransomware attacks?

Identity and Access Management (IAM)

- What identity and access management platform do you use, and how do you manage user lifecycle (provisioning, modification, deprovisioning)?
- Do you implement privileged access management (PAM) solutions for administrative accounts and high-risk systems?
- How do you manage service accounts, API keys, and other non-human identities?
- What access review and recertification processes do you have to ensure access rights remain appropriate?

Mobile and Endpoint Security

- What mobile device management (MDM) or endpoint detection and response (EDR) solutions do you deploy?
- How do you secure employee personal devices that access company data (BYOD policies)?
- What controls do you have for removable media and USB devices?
- Do you implement application whitelisting or other endpoint protection measures?

Security Testing and Validation

- How frequently do you conduct penetration testing, and do you use internal resources or third-party security firms?
- Do you perform red team exercises or simulate advanced persistent threat (APT) scenarios?
- What secure code review and application security testing processes do you have for internally developed software?
- Do you conduct security assessments of your physical facilities and infrastructure?

Compliance and Regulatory Security

- What security compliance frameworks do you adhere to beyond those mentioned (PCI DSS, HIPAA, FedRAMP, etc.)?
- How do you ensure compliance with data residency and sovereignty requirements in different jurisdictions?
- What security audit trails and logging do you maintain to support compliance reporting?
- Do you have processes for security compliance gap analysis and remediation?

Threat Intelligence and Advanced Security

- Do you subscribe to threat intelligence feeds or participate in industry security information sharing programs?
- What advanced security technologies do you employ (AI/ML-based security, user and entity behavior analytics, deception technology)?
- How do you stay current with emerging cybersecurity threats and attack vectors relevant to your industry?
- Do you have a security research and development program to address evolving threats?

Security Metrics and Reporting

- What key security metrics do you track and report to leadership (mean time to detect, mean time to respond, etc.)?
- How do you measure the effectiveness of your security controls and overall security posture?
- What security reporting do you provide to clients or stakeholders, and how frequently?

- Do you benchmark your security performance against industry standards or peer organizations?

Business Continuity and Security

- How do you ensure security controls remain effective during business continuity or disaster recovery scenarios?
- What security considerations are included in your crisis management and emergency response plans?
- How do you maintain security operations during staff shortages or remote work situations?
- What are your procedures for secure disposal of IT equipment and media containing sensitive data?

Data Privacy and Data Protection Compliance - Additional Questions

Privacy Governance and Program Management

- What is your organizational structure for privacy governance, including privacy committees, privacy impact assessment processes, and escalation procedures?
- How do you conduct privacy risk assessments for new products, services, or business processes that involve personal data?
- What privacy training programs do you provide to employees, and how do you ensure ongoing awareness of privacy obligations?
- Do you maintain a data inventory or data mapping that catalogs all personal data processing activities, purposes, and data flows?

Data Subject Rights and Individual Controls

- What processes do you have to handle data subject rights requests (access, rectification, erasure, portability, restriction of processing, objection)?
- What is your typical response time for data subject requests, and how do you verify the identity of individuals making such requests?
- Do you provide individuals with clear privacy notices and obtain appropriate consent where required by applicable laws?
- How do you handle consent withdrawal requests and ensure processing stops when consent is withdrawn?

Data Processing and Purpose Limitation

- What is your legal basis for processing personal data under applicable privacy laws (consent, contract, legitimate interest, etc.)?
- How do you ensure data is only used for the purposes specified in your privacy notices and agreements?
- Do you perform any automated decision-making or profiling using personal data, and if so, what safeguards are in place?

- What controls do you have to prevent unauthorized or excessive data collection beyond what is necessary for the stated purpose?

Third-Party Data Sharing and Processing

- Do you share personal data with any third parties (subprocessors, service providers, partners), and if so, what contractual protections are in place?
- How do you conduct due diligence on third parties who will process personal data on your behalf?
- What notification and approval processes do you have for engaging new subprocessors or changing data processing arrangements?
- Do you maintain a public register or list of subprocessors as required by some privacy laws?

Technical and Organizational Measures

- What specific technical and organizational measures (TOMs) do you implement to ensure data protection by design and by default?
- How do you implement data minimization principles in your data collection and processing practices?
- What pseudonymization or anonymization techniques do you employ to reduce privacy risks?
- Do you conduct regular privacy audits or assessments of your technical and organizational measures?

International Data Transfers and Localization

- Which countries or regions do you transfer personal data to, and what is the adequacy status of those destinations?
- Do you have binding corporate rules (BCRs) or other intragroup transfer mechanisms if you operate across multiple jurisdictions?
- How do you handle data localization requirements that may prohibit certain cross-border transfers?
- What procedures do you have for government data access requests in different jurisdictions?

Privacy by Design and Technology

- How do you incorporate privacy considerations into your system design and development lifecycle?
- What privacy-enhancing technologies (PETs) do you employ, such as differential privacy, homomorphic encryption, or secure multi-party computation?
- Do you conduct privacy impact assessments (PIAs) or data protection impact assessments (DPIAs) for high-risk processing activities?
- How do you ensure privacy controls are maintained during system updates, migrations, or technology changes?

Vendor and Client Data Handling

- What data processing agreements (DPAs) or privacy terms do you typically execute with clients who provide personal data?
- How do you handle situations where you receive personal data that you weren't expecting or authorized to receive?
- What procedures do you have for returning or deleting client personal data upon contract termination?
- Do you provide clients with audit rights or compliance reports regarding your privacy practices?

Privacy Incident Management

- What constitutes a privacy incident or personal data breach under your incident response procedures?
- What is your process for assessing the risk and severity of privacy incidents?
- How do you meet regulatory notification requirements (e.g., 72-hour GDPR breach notification to supervisory authorities)?
- What communication protocols do you have for notifying affected individuals and clients about privacy incidents?

Regulatory Engagement and Compliance Monitoring

- How do you monitor changes in privacy laws and regulations that may affect your operations?
- Have you received any inquiries, investigations, or enforcement actions from privacy regulators?
- Do you participate in privacy certification programs or adhere to approved codes of conduct?
- What relationships do you maintain with privacy regulators or industry privacy organizations?

Emerging Privacy Technologies and Trends

- How do you address privacy implications of artificial intelligence and machine learning systems that process personal data?
- What considerations do you have for biometric data, location data, or other sensitive categories of personal data?
- How do you handle privacy requirements for Internet of Things (IoT) devices or connected products?
- What is your approach to privacy in cloud computing environments and multi-tenant systems?

Privacy Metrics and Reporting

- What privacy performance metrics do you track (incident response times, data subject request fulfillment, privacy training completion)?
- How do you measure and report on the effectiveness of your privacy program?
- What privacy reporting do you provide to senior management and board of directors?
- Do you conduct regular privacy maturity assessments or benchmarking against industry standards?

Sanctions, Anti-Bribery/Corruption, and AML Compliance - Additional Questions

Enhanced Sanctions and Trade Compliance

- Do you maintain procedures to monitor and comply with export controls, trade embargoes, and dual-use technology restrictions (such as EAR, ITAR, or equivalent international regulations)?
- How frequently do you update your sanctions screening systems, and what databases do you use beyond OFAC (EU Consolidated List, UN Security Council, HM Treasury, etc.)?
- Do you have processes to screen transactions, shipments, and business activities in real-time against sanctions lists?
- What procedures do you have for handling indirect sanctions exposure through subsidiaries, joint ventures, or business partners in sanctioned jurisdictions?

Third-Party Risk Management and Due Diligence

- What enhanced due diligence procedures do you perform on high-risk third parties, including agents, distributors, consultants, and joint venture partners?
- Do you require anti-corruption representations and covenants in contracts with third parties who act on your behalf?
- How do you monitor ongoing compliance of third parties with anti-corruption and sanctions requirements throughout the relationship?
- What red flag indicators do you look for when assessing third-party corruption and sanctions risks?

Financial Crime Prevention and Detection

- Do you have transaction monitoring systems to detect unusual patterns that might indicate money laundering, sanctions evasion, or other financial crimes?
- What customer identification and verification procedures do you maintain, and how do you handle high-risk customer categories?
- Do you maintain suspicious activity reporting procedures, and have you filed any suspicious activity reports (SARs) or similar regulatory filings?
- How do you handle cash transactions, correspondent banking relationships, or other high-risk financial activities if applicable to your business?

Geographic and Jurisdictional Risk Management

- Do you conduct business in or have connections to high-risk jurisdictions identified by FATF or other international bodies?
- What enhanced controls do you have for operations in countries with weak anti-corruption or AML frameworks?
- How do you assess and manage country risk, including changes in sanctions regimes or corruption risk ratings?
- Do you have any business relationships or operations in jurisdictions under comprehensive sanctions programs?

Anti-Corruption Program Effectiveness

- How do you measure the effectiveness of your anti-corruption program, and what key performance indicators do you track?
- Do you conduct periodic corruption risk assessments, and how do you update your controls based on identified risks?
- What internal audit or compliance testing do you perform on your anti-corruption controls?
- Have you engaged external advisors or consultants to assess your anti-corruption program's adequacy?

Record Keeping and Documentation

- What records do you maintain to demonstrate compliance with sanctions, anti-corruption, and AML requirements?
- How long do you retain compliance-related records, and what procedures ensure their availability for regulatory examinations?
- Do you maintain accurate books and records that comply with accounting standards and anti-corruption laws?
- What documentation do you require for expense reports, entertainment, gifts, and other potentially sensitive expenditures?

Regulatory Engagement and Enforcement History

- Have you received any inquiries, subpoenas, or requests for information from law enforcement or regulatory agencies regarding sanctions, corruption, or AML matters?
- Have you made any voluntary self-disclosures to regulatory authorities regarding potential compliance violations?
- What is your policy for cooperating with law enforcement investigations or regulatory examinations?
- Do you maintain relationships with external counsel specializing in sanctions, anti-corruption, or AML matters?

Business Partner and Joint Venture Compliance

- How do you ensure that joint venture partners and strategic alliances maintain adequate compliance programs?
- What compliance representations and ongoing monitoring requirements do you include in partnership agreements?
- Do you have the right to audit or assess the compliance programs of key business partners?
- How do you handle situations where business partners may have different compliance standards or risk tolerances?

Technology and Digital Compliance

- Do you use automated sanctions screening and compliance monitoring technologies, and how do you ensure their accuracy and completeness?

- What cybersecurity measures protect your compliance systems and sensitive compliance data?
- How do you handle compliance requirements for digital assets, cryptocurrency, or other emerging financial technologies?
- Do you have procedures for ensuring compliance in electronic communications and digital record-keeping?

Training and Culture

- Beyond basic training, do you provide role-specific compliance training for employees in higher-risk positions?
- How do you assess the effectiveness of your compliance training programs?
- What tone-at-the-top messaging and leadership commitment do you demonstrate regarding compliance?
- Do you have whistleblower protection policies and anonymous reporting mechanisms for compliance concerns?

Incident Response and Remediation

- What procedures do you have for investigating potential compliance violations or suspicious activities?
- How do you handle situations where you discover potential sanctions violations or corruption incidents?
- What disciplinary measures do you take for compliance violations, and how do you ensure consistent enforcement?
- Do you have procedures for implementing corrective actions and preventing recurrence of compliance issues?

Cross-Border and International Considerations

- How do you ensure compliance with multiple jurisdictions' anti-corruption laws when operating internationally?
- Do you have procedures for handling conflicts between different countries' sanctions or compliance requirements?
- What due diligence do you perform on foreign subsidiaries or affiliates to ensure they meet compliance standards?
- How do you manage compliance risks associated with correspondent banking, trade finance, or cross-border payments?

Here are additional Insurance and Liability Coverage questions to complement your existing set:

Insurance and Liability Coverage - Additional Questions

Specialized Insurance Requirements

- Do you maintain directors and officers (D&O) liability insurance, and what are the coverage limits and key exclusions?
- If you handle transportation or logistics, do you carry cargo insurance, marine insurance, or commercial auto liability coverage?
- Do you maintain employment practices liability insurance (EPLI) to cover wrongful termination, discrimination, or harassment claims?
- For international operations, do you carry political risk insurance or kidnap and ransom insurance in high-risk jurisdictions?

Insurance Program Structure and Management

- Do you work with an insurance broker or risk management consultant to structure your insurance program?
- How frequently do you review and update your insurance coverage limits and policy terms?
- Do you maintain an umbrella or excess liability policy that provides additional coverage above your primary policies?
- What is your approach to self-insurance or captive insurance arrangements, if any?

Policy Terms and Conditions

- What are the key exclusions in your primary liability policies that could affect coverage for services provided to clients?
- Do your insurance policies include coverage for regulatory fines and penalties, or are these excluded?
- What are the deductibles or self-insured retentions for each of your major insurance policies?
- Do you have "occurrence" or "claims-made" liability policies, and what are the retroactive dates and extended reporting periods?

Business Interruption and Contingency Coverage

- Do you maintain business interruption insurance to cover lost income and extra expenses following a covered loss?
- What is the waiting period and maximum coverage period for your business interruption insurance?
- Do you have contingent business interruption coverage for losses caused by key suppliers or customers?
- Do you maintain extra expense coverage for costs incurred to minimize business interruption?

Technology and Cyber Insurance Details

- Beyond basic cyber liability, do you have coverage for business interruption due to cyber incidents?
- Does your cyber insurance include coverage for social engineering fraud, funds transfer fraud, or ransomware payments?
- What is the scope of your cyber insurance coverage (first-party costs, third-party liability, regulatory fines, etc.)?

- Do you have coverage for cloud service interruptions or software-as-a-service failures?

International and Cross-Border Coverage

- Do your insurance policies provide global coverage, or do you maintain separate policies in different jurisdictions?
- How do you ensure adequate coverage for cross-border data transfers and international privacy law violations?
- Do you have foreign voluntary workers' compensation or international travel insurance for employees working abroad?
- What coverage do you have for foreign exchange fluctuations affecting insurance claims or settlements?

Environmental and Safety Insurance

- Do you maintain environmental liability insurance for pollution incidents or environmental cleanup costs?
- If applicable, do you carry product recall insurance or contaminated products insurance?
- Do you have coverage for occupational health and safety violations or workplace safety incidents?
- What insurance coverage do you maintain for any hazardous materials or waste disposal activities?

Contract and Project-Specific Insurance

- Can you obtain additional insurance coverage or increase limits for specific high-value contracts or projects?
- Do you have the ability to name clients as additional insureds on your liability policies when contractually required?
- What is your process for providing proof of insurance and meeting client-specific insurance requirements?
- Do you maintain separate coverage for subcontractors or can you extend coverage to include their activities?

Insurance Financial Stability and Claims Management

- What is the financial rating (A.M. Best, S&P, Moody's) of your primary insurance carriers?
- Do you have experience with your insurers' claims handling processes, and what is their typical claims resolution timeframe?
- Have you ever had insurance coverage denied or disputed by your carriers, and if so, what was the outcome?
- What is your internal process for reporting potential claims and managing the claims process?

Risk Management and Loss Prevention

- What risk management programs or loss prevention measures do you implement to minimize insurance claims?
- Do you conduct regular safety training, risk assessments, or other proactive risk management activities?
- How do you track and analyze incident data to identify trends and prevent future losses?
- Do your insurance carriers provide risk management services or require specific safety protocols?

Insurance Compliance and Regulatory Requirements

- Do you maintain insurance coverage that meets all regulatory requirements in your operating jurisdictions?
- How do you ensure compliance with client contractual insurance requirements across different engagements?
- Do you have procedures for notifying insurers of material changes to your business that could affect coverage?
- What is your process for ensuring continuous insurance coverage without gaps during policy renewals?

Alternative Risk Transfer and Financial Protection

- Do you participate in any alternative risk transfer mechanisms such as captive insurance companies or risk retention groups?
- Do you maintain any surety bonds, letters of credit, or other financial guarantees as alternatives to insurance?
- What parent company guarantees or other financial backing do you have beyond insurance coverage?
- Do you have access to additional financial resources or credit facilities to cover uninsured losses or large deductibles?

Business Continuity and Disaster Recovery - Additional Questions

Comprehensive Risk Assessment and Scenario Planning

- What business impact analysis (BIA) have you conducted to identify critical business functions, dependencies, and maximum tolerable downtimes?
- How do you assess and prioritize different threat scenarios (cyber attacks, pandemics, supply chain disruptions, key person loss, etc.)?
- What alternative operating strategies do you have for extended disruptions lasting weeks or months?
- How do you evaluate and update your risk assessment to account for emerging threats and changing business operations?

Technology Recovery and Infrastructure Resilience

- What specific technology recovery procedures do you have for different types of system failures (hardware, software, network, database)?
- Do you maintain hot, warm, or cold standby systems, and what are the activation procedures and timeframes?
- How do you ensure data synchronization and integrity between primary and backup systems?
- What cloud-based or hybrid recovery solutions do you employ, and how do you manage multi-cloud redundancy if applicable?

Operational Continuity and Resource Management

- What alternative work arrangements do you have (remote work capabilities, alternate facilities, mobile operations)?
- How do you ensure continuity of critical business processes beyond IT systems (manufacturing, logistics, customer service)?
- What cross-training programs do you have to ensure multiple employees can perform critical functions?
- How do you manage and prioritize resource allocation during a crisis when multiple systems or processes are affected?

Supply Chain and Third-Party Resilience

- What business continuity requirements do you impose on critical suppliers and service providers?
- Do you maintain alternate suppliers or backup service providers for essential goods and services?
- How do you monitor the business continuity preparedness of your key dependencies?
- What procedures do you have for supplier failure or third-party service disruptions?

Communication and Stakeholder Management

- What internal communication systems and backup communication methods do you maintain during disruptions?
- How do you manage external communications with customers, regulators, media, and other stakeholders during a crisis?
- What customer notification procedures and service level commitments do you provide during disruptions?
- Do you have established relationships with emergency services, regulatory bodies, and other external support organizations?

Pandemic and Health Emergency Preparedness

- What specific procedures do you have for health emergencies or pandemic situations affecting your workforce?
- How do you maintain business operations with reduced staffing or remote work requirements?
- What health and safety protocols do you implement to protect employees while maintaining business continuity?

- How do you manage supply chain disruptions related to health emergencies or travel restrictions?

Financial and Legal Continuity

- What financial contingencies do you maintain for business disruption scenarios (emergency funding, insurance claims, etc.)?
- How do you ensure continued compliance with regulatory requirements and contractual obligations during disruptions?
- What legal and contractual protections do you have in place for force majeure events?
- Do you have procedures for maintaining financial reporting, payroll, and other critical business functions during extended disruptions?

Geographic and Location-Specific Planning

- If you operate in multiple locations, how do you coordinate business continuity across different sites and regions?
- What location-specific risks have you identified (natural disasters, political instability, infrastructure vulnerabilities)?
- Do you have procedures for relocating operations or redistributing workloads between different geographic locations?
- How do you ensure consistent business continuity standards across all operational locations?

Testing, Training, and Maintenance

- Beyond full tests, what ongoing testing do you perform (tabletop exercises, component testing, communication drills)?
- How do you train employees on their roles and responsibilities during business continuity events?
- What schedule do you maintain for reviewing, updating, and improving your business continuity plans?
- How do you incorporate lessons learned from actual incidents or exercises into plan improvements?

Regulatory and Compliance Continuity

- How do you ensure continued compliance with industry regulations and standards during business disruptions?
- What reporting requirements do you have to regulators or clients regarding business continuity incidents?
- Do you maintain specific business continuity capabilities required by regulatory frameworks (banking, healthcare, etc.)?
- How do you manage data retention, audit trails, and other compliance requirements during recovery operations?

Vendor and Client Impact Management

- What procedures do you have for managing client data and services during business continuity events?

- How do you prioritize client services and communications during limited-capacity operations?
- What alternative service delivery methods can you implement to minimize client impact?
- Do you have mutual aid agreements or reciprocal arrangements with other organizations in your industry?

Emerging Threats and Adaptive Planning

- How do you incorporate cybersecurity incident response into your broader business continuity planning?
- What procedures do you have for business continuity during extended cyber attacks or system compromises?
- How do you address business continuity implications of emerging technologies or changing business models?
- What continuous improvement processes do you have to adapt your business continuity capabilities to evolving threats?

Performance Monitoring and Metrics

- What key performance indicators do you use to measure business continuity preparedness and response effectiveness?
- How do you benchmark your business continuity capabilities against industry standards or peer organizations?
- What post-incident analysis and reporting do you conduct to evaluate business continuity performance?
- How do you measure and report on the business impact and costs of continuity events?

Here are additional Operational Capability and Subcontractor Risk questions to complement your existing set:

Operational Capability and Subcontractor Risk - Additional Questions

Capacity Planning and Scalability

- What is your current utilization rate, and what additional capacity do you have to take on new engagements without impacting existing commitments?
- How do you forecast and plan for capacity requirements, and what lead times are needed to scale up operations?
- What mechanisms do you have to handle demand spikes or urgent requests that exceed normal capacity?
- Do you have partnerships or overflow arrangements with other providers to handle capacity constraints?

Performance Monitoring and Continuous Improvement

- What key performance indicators (KPIs) do you track for operational performance, and how frequently are they reviewed?
- How do you benchmark your performance against industry standards or competitors?
- What continuous improvement methodologies do you employ (Kaizen, PDCA cycle, etc.), and how often do you review processes?
- Do you conduct regular customer satisfaction surveys or feedback sessions to identify improvement opportunities?

Technology and Innovation Capabilities

- What is your technology roadmap, and how do you ensure your systems and processes remain current and competitive?
- How do you evaluate and integrate new technologies or methodologies into your operations?
- What research and development capabilities do you maintain to enhance your service offerings?
- Do you have partnerships with technology vendors or academic institutions to stay current with industry developments?

Subcontractor Management and Oversight

- What criteria do you use to select and approve subcontractors, and how frequently do you reassess their performance?
- Do you conduct on-site audits or assessments of key subcontractors' facilities and operations?
- How do you monitor subcontractor performance against the same standards you maintain internally?
- What contingency plans do you have if a critical subcontractor fails to perform or becomes unavailable?

Geographic and Multi-Location Operations

- If you operate from multiple locations, how do you ensure consistent service delivery and quality across all sites?
- What coordination mechanisms do you have between different operational locations?
- How do you manage time zone differences and ensure continuous service availability?
- What location-specific risks or capabilities should we be aware of that could impact service delivery?

Talent Management and Skills Development

- What recruitment and retention strategies do you employ to maintain adequate skilled personnel?
- How do you identify and address skills gaps within your organization?
- What training and professional development programs do you provide to ensure staff remain current with industry best practices?

- Do you have succession planning for key personnel who are critical to service delivery?

Client Communication and Relationship Management

- What regular reporting and communication protocols do you maintain with clients?
- How do you handle client feedback, complaints, or requests for service modifications?
- What account management structure do you have to ensure consistent client relationship management?
- Do you provide clients with visibility into your operational metrics and performance dashboards?

Change Management and Version Control

- What change management processes do you have for modifying services, systems, or procedures that could impact clients?
- How do you communicate and coordinate changes with clients before implementation?
- What rollback procedures do you have if changes cause service disruptions or quality issues?
- How do you manage version control for deliverables, documentation, and system configurations?

Risk Management and Operational Controls

- What operational risk assessments do you conduct, and how frequently are they updated?
- What internal controls do you have to prevent operational errors, fraud, or quality failures?
- How do you segregate duties and implement authorization controls for critical operational processes?
- What key risk indicators do you monitor to proactively identify potential operational issues?

Compliance and Regulatory Operations

- How do you ensure ongoing compliance with industry-specific operational requirements and standards?
- What audit procedures do you have for operational compliance, and how often are they conducted?
- How do you stay current with changing regulatory requirements that could impact your operations?
- What documentation and record-keeping procedures do you maintain to support compliance reporting?

Innovation and Service Enhancement

- How do you identify opportunities to enhance or expand your service offerings?

- What process do you have for piloting new services or operational improvements?
- How do you gather and incorporate client feedback into service development?
- Do you have innovation partnerships or collaborations that could benefit your service delivery?

Additional ESG and Sustainability Questions

Environmental Management and Climate Action

- Do you measure and report your carbon footprint or greenhouse gas emissions (Scope 1, 2, and 3)?
- What specific environmental management systems or certifications do you maintain (ISO 14001, EMAS, etc.)?
- How do you manage water usage, waste reduction, and resource efficiency in your operations?
- Do you have renewable energy commitments or sustainable sourcing policies?

Social Impact and Community Engagement

- What community investment or social impact programs does your organization support?
- How do you measure and report on your social impact and community contributions?
- Do you have partnerships with local organizations, educational institutions, or non-profits?
- What policies do you have regarding fair trade, ethical sourcing, or support for local suppliers?

Supply Chain ESG Management

- How do you assess and monitor ESG practices throughout your supply chain?
- What requirements do you impose on suppliers regarding environmental and social standards?
- Do you conduct supplier ESG audits or require sustainability certifications?
- How do you address potential ESG violations or concerns identified in your supply chain?

Governance and Ethics Enhancement

- What board oversight exists for ESG matters, and how frequently are ESG issues reviewed at the board level?
- Do you have dedicated ESG leadership roles or committees within your organization?
- How do you integrate ESG considerations into strategic decision-making and business planning?
- What stakeholder engagement processes do you have for ESG matters?

Data and Transparency in ESG Reporting

- Do you use any ESG reporting frameworks (GRI, SASB, TCFD, UN Global Compact, etc.)?
- How do you ensure the accuracy and reliability of your ESG data and reporting?

- Do you obtain third-party verification or assurance for your ESG disclosures?
- What ESG targets or commitments have you made, and how do you track progress against them?

Customer References and Reputation Risk - Additional Questions

Reference Quality and Diversity

- Can you provide references from clients in similar industries or with comparable service requirements to our organization?
- Do you have references from both long-term clients (3+ years) and recent clients (within the last 12 months) to demonstrate consistency over time?
- Can you provide references that specifically speak to your performance during challenging situations or crisis management?
- Do you have references from clients who have used multiple service lines or have expanded their engagement with you over time?

Performance History and Track Record

- What is your client retention rate over the past three years, and what are the primary reasons for client departures?
- Have you ever had a client reduce the scope of services or decline to renew due to performance issues?
- Can you provide examples of how you have exceeded client expectations or delivered exceptional value?
- What is your average client relationship duration, and how do you measure client satisfaction?

Market Position and Competitive Standing

- How do you differentiate yourself from competitors, and what do clients typically cite as your key strengths?
- Have you won any competitive bids or displaced incumbent providers? If so, what were the key factors in your selection?
- Do you participate in industry peer reviews, benchmarking studies, or comparative assessments?
- What market share or position do you hold in your primary service areas?

Professional Network and Industry Relationships

- Can you provide professional references from industry associations, regulatory bodies, or standards organizations?
- Do you have references from technology partners, alliance partners, or other strategic relationships?
- Can you provide references from professional service providers (auditors, legal counsel, consultants) who work with your organization?

- What peer recognition have you received from industry publications, analyst firms, or professional organizations?

Thought Leadership and Industry Contributions

- Do your executives speak at industry conferences, contribute to publications, or participate in standards-setting bodies?
- Have you contributed to industry best practices, white papers, or research initiatives?
- Do you participate in industry working groups, advisory panels, or regulatory consultations?
- What thought leadership content have you published that demonstrates your expertise?

Digital Reputation and Online Presence

- How do you monitor and manage your online reputation across various digital platforms and review sites?
- Have you addressed any negative online reviews, social media criticism, or digital reputation issues?
- What is your approach to social media management and corporate communications?
- Do you have a crisis communications plan for managing reputational issues in the digital age?

Stakeholder Feedback and Third-Party Assessments

- Do you regularly conduct stakeholder surveys or feedback sessions with clients, employees, and partners?
- Have you participated in any third-party assessments, such as customer satisfaction studies or market research?
- Can you provide results from any independent quality assessments or service evaluations?
- What external validation have you received for your service quality or business practices?

Regulatory and Compliance Reputation

- Have you received any recognition from regulatory bodies for compliance excellence or best practices?
- Can you provide references from regulatory contacts who can speak to your compliance history and cooperation?
- Have you been involved in any regulatory guidance development or policy consultation processes?
- What is your track record with regulatory examinations, audits, or oversight activities?

Historical Performance Under Stress

- Can you provide examples of how you maintained service quality during economic downturns, market volatility, or industry disruptions?

- How have you handled situations where clients faced financial difficulties or organizational changes?
- What is your track record for maintaining relationships during merger and acquisition activities (either your own or your clients')?
- Can you demonstrate your ability to scale services up or down based on changing client needs?

Innovation and Value Creation History

- Can you provide examples of innovative solutions you've developed for clients or process improvements you've implemented?
- Have clients recognized you for driving cost savings, efficiency improvements, or business value creation?
- What is your track record for successful technology implementations or digital transformation projects?
- Do you have case studies demonstrating measurable business impact or return on investment for clients?

Global and Cultural Competency

- If applicable, can you provide references for international or cross-cultural service delivery?
- How do you demonstrate cultural sensitivity and local market knowledge in diverse operating environments?
- What is your experience working with multinational organizations or complex global service requirements?
- Can you provide examples of successful localization or adaptation of services for different markets?

Risk Management and Crisis Response

- Can you provide examples of how you've helped clients navigate significant business challenges or crises?
- What is your track record for maintaining service continuity during your own operational challenges?
- How have you handled situations involving data incidents, security breaches, or other sensitive issues?
- Can you demonstrate your ability to provide objective risk assessments and recommendations to clients?

Long-term Partnership and Strategic Value

- Can you provide examples of how you've evolved services over time to meet changing client needs?
- What strategic insights or market intelligence have you provided that created value for clients?
- How do you demonstrate your commitment to long-term client success beyond immediate service delivery?

- Can you provide examples of collaborative innovation or joint problem-solving with clients?
